

The Benefits of Working with CANARX as Your IPSP

Maybe you've heard about International Prescription Service Providers (IPSP). Maybe you're unsure if it's right for your public-sector or self-funded program. For starters, employees have zero copays for more than 300 maintenance medications offered through CANARX, the first-ever IPSP to serve U.S. residents.

And it doesn't just benefit members. Municipalities, organizations and companies save an average of 70 percent on their prescription coverage costs. CANARX also makes it easy for plan administrators to get started.

No Administrative Costs

There are no administrative costs with CANARX. Our customer services are free to plan administrators. You only pay for the low cost of medications.

No-Cost Delivery Interruption Replacement

When something goes wrong with delivery, there's no cost to replacing the shipment to your employees. This ensures they always have the medications they need – for free.

Plan Design and Development Assistance

CANARX is here to help with every aspect of plan implementation, from design to launch. This includes the development of the plan structure and member incentives as well as introduction letters and welcome packets for your eligible employees.

Website Designing and Hosting

CANARX helps develop and launch your plan's dedicated website, where employees can find all the necessary enrollment materials. They even help direct end-users to the site with plan codes distributed by mail and email.

Seminars and Enrollment Presentation

With ongoing support through marketing campaigns, enrollment sessions, seminars and on-site presentations where reps talk directly to members – CANARX helps get the word out.

Liability Insurance Coverage

CANARX is fully covered by elite liability insurance via Lloyd's of London, protecting all plan members, pharmacies, plan sponsors and brokers.

Local Servicing

CANARX's 24/7 call center is located at its Windsor, Ontario, headquarters. All calls are never outsourced and go to a knowledgeable, live person. And they have a pharmacist on staff to answer any questions about prescriptions.

In addition, there are no questions about safety with CANARX, which has been operating since 2002. Medications are sent from the pharmaceutical manufacturer to Tier 1 countries where standards meet or exceed those in the U.S., then from the wholesaler to the registered pharmacist, and finally directly to your members in the manufacturer's original, sealed packaging.

CANARX is simply a win-win for employers and members. For all these reasons and more, CANARX simply sets the standard for prescription medication safety and savings.
